

## Mockup review notes:

### Type:

- Switch body to sans serif (maybe source sans pro?) and headers to an old-looking serif.
- track out the body copy just a little bit, feels squished right now
- white text on black at bottom of page is hard to read, maybe keep the background color a dark blue towards the bottom?

### Content:

- Trim down, get rid of “binding rules and sinful origins”
- Get rid of the pop culture section
- Add references part at the bottom (wikipedia page, image citations), lighter color like the top of the page

### Layout:

- More breathing room on sides of page
- Top of page doesn't show content yet
- Nav sticks at top of page when you scroll down, maybe “selkies” gets added to it

### Images:

- Try monotone/duotones
- Align with text or lines
